YOU ASKED - WE LISTENED

We've introduced some high temperature coatings for under insulation corrosion and other hot or aggressive environments you may have. We've done thorough research and have partnered with Highland International, who have capabilities server cycling condition up to 1,200 F.

HIGHLAND HI TEMP COATINGS FOR PEAK PERFORMANCE

Highland HiTemp Coatings provide aesthetic and durable protection for surface temperatures, & HiTemp Dry-Fall Coatings provide the same high performance protection while reducing labor costs by eliminating brush and roll application, reducing plant shut-down time, and eliminating expensive overspray removal.

Paint overspray from Highland HiTemp Dry-Fall coatings is powder dry within 10-20 feet from point of application and wipes off without chemicals or buffing. Highland Dry-Fall allows "Spray-Safe" application in congested areas which will reduce labor costs, shorten plant down time and eliminate expensive overspray removal. Without sacrifice to durability or aesthetics, you can safely use spray application in areas where there is a high risk for paint overspray damage.

Highland's HiTemp Line of Coatings offer unmatched performance against high heat and thermal shock environments while also offering ease of application, superior aesthetics and longevity compared to the competition. These coatings are widely used in many industries including oil/gas, pulp/paper, steel mills, and more.

**Come see us at our
UPCOMING EVENTS**

**51st KGA Annual Meeting -
June 7-9**

**Annual USI Customer Appreciation
Golf Outing-
June 9**

USI ANNUAL CUSTOMER APPRECIATION GOLF OUTING

Join us Friday, June 9 2017 at:

Mystic Creek Golf Course
One Champions Circle
Milford, MI 48380
