

Project: Stainless Steel Conveyer Dearborn, Michigan

The Problem

This stainless steel Flat Top Conveyer in a local Auto Plant was constantly getting wet causing a major slip hazard to the assembly drivers.

Unconventional Solutions was called in to solve the problem.

The Solution

The conveyer was cleaned and coated with our **USI LV** with **USI Safety Grip** system to offer the assembly plant a long term solution over the conventional safety tape. This gave it a 10 to 15 time longer life than construction safety tapes and is now stocked in their general supply.
