

Project: Leaking Pipe Repair

The Problem

On New Year's Day this drain commission had a bad leak on a 3 inch "T" and had no replacement parts they could use.

Fortunately, they had ordered Unconventional Solutions Pipe Repair four months earlier.

The Solution

They used the **USI Pipe Repair** and were able to make an online repair at 80 psi without shutting down.

This repair has been in service for over 7 years. It was a short term repair that gave long-term results.

Think of Unconventional Solutions as your repair and protection specialist as an alternative to expensive replacement costs.
