For the Unique Solution in the above photos, the knowledgeable USI Team Members chose a product from

epigen

Performance Resins & Composite Systems

Epigen 301 Epoxing Backing Grout was chosen. Epigen 301 is a tough infusible solvent free advanced composite system developed to be used as a multipurpose high strength casting and grouting polymer. It exhibits excellent **chemical resistance**, corrosion resistance, and high structural integrity under stress in both compression and tension. This product is designed to be used effectively in hot or cold climates, and is able to be blended with graded aggregate without appreciable loss of strength. Addition of graded aggregate is recommended when installation depth is extreme or to control excessive exotherm under hot conditions. Suitable for use on a variety of surfaces including steel, wood, and concrete.

TYPICAL APPLICATIONS
