

## NOTICING GALVANIC CORROSION IN YOUR CHILLER?

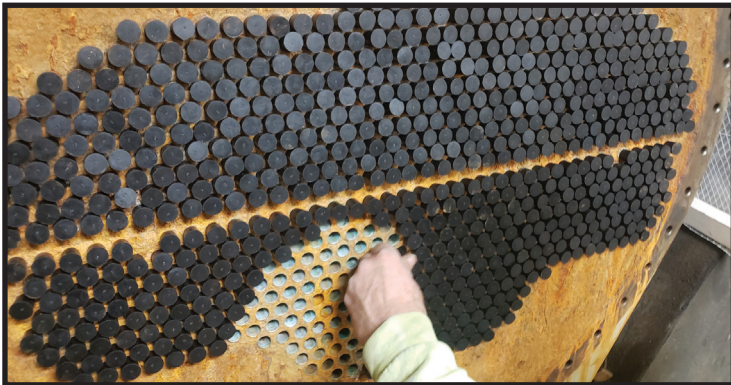

*What would happen if the Galvanic Corrosion caused a tube leak?*

**WOULD YOU LIKE TO ENHANCE YOUR CHILLERS PERFORMANCE?**

**IMAGINE PROTECTING YOUR CHILLER AND AVOIDING FUTURE ISSUES.**

According to Energy.gov.au, HVAC systems typically consume around 70% of a base building's energy usage, with 25-35% of energy consumed by chillers producing chilled water for air-conditioning. Therefore, the efficiency of chillers and the optimisation of their performance within the HVAC systems they operate are important in achieving high performance.

***Imagine a successful refurbishment of your Chillers/Heat Exchangers saving you money and making you the HERO.***

USI has had much success time and time again with *Repair, Enhancement and Protection* by using **Resimac Resimetal 101 Metal Repair Paste** or **Resimac Resimetal 201 Ceramic Repair Paste** along with 2 coats of **Resimac Resimetal 203 Superflow Ceramic Repair Fluid** (one coat in red, one coat in gray - ASK us WHY two colors is a Best Practice). Not only is the USI Team able to help you be successful with refurbishing your chillers/heat exchangers, the Resimac line of products also has a proven history in industrial and marine applications including worn impellers, damaged valves, separator housings, damaged pump casings, eroded pipe work, propellers, bow thrusters, rudders, corroded water boxes, end plates and tubesheets. A USI Technical Consultant will come to your site and quote your refurbishment.

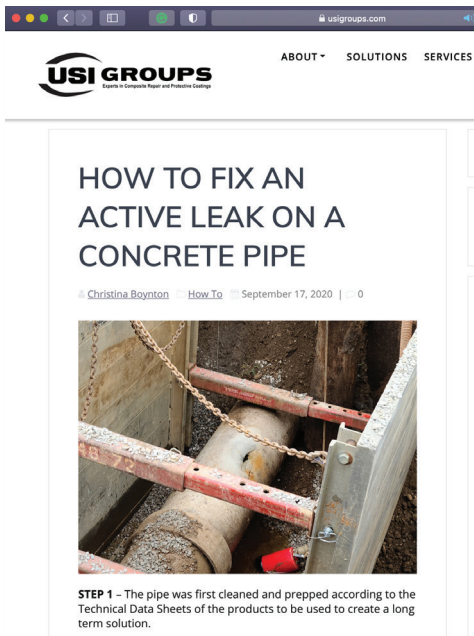

**Contact USI TODAY 248-735-7000 for quick delivery of your materials and to schedule time with our Training Experts. Let the USI Team find the BEST Solution for your Unique Issues.**

# October 2020 UPCOMING EVENTS

- Tuesday October 13 - OGA Corrosion Control Virtual Seminar
- Tuesday October 20 - NACE CRCUC Meeting, Joliet, IL
