

DO YOU HAVE PIPES THAT HAVE CORROSION AND EROSION BUT ARE IMPOSSIBLE TO REPLACE?

So did this Ohio based Paper Mill Plant.

This company contacted the USI Team with this exact issue of having leaking, corroded, eroded pipes that are not only impossible to replace, but that they needed to find a solid solution to extend the life of the pipes without replacing them.

The USI Team chose a solution of using a high performance, rapid curing, moisture activated Pipe Repair Wrap. This Pipe Repair Wrap is specifically developed for the repair of leaking pipes and is activated by immersion in water. **PSI for this Pipe Repair Wrap can go up to 750psi/50bar.**

This Pipe Repair Wrap can also be used as an ARO (Abrasion Resistant Outerwrap) for HDD (Horizontal Directional Drilling) over a two part epoxy or other corrosion coating. USI has several Utility Companies using our warehouse stocked BoreShield ARO. Ask our USI Team about BoreShield ARO II, which has excellent abrasion, impact and wear resistance along with superior toughness and resistance to environmental degradation.

THERE'S NEVER BEEN A BETTER TIME TO
