

## DO YOU HAVE AN ACTIVE LEAK ON A CONCRETE PIPE?

This Paper Mill had a Utility Company drill a hole into their 22" Asbestos Cement Transite Pipe. The Utility Company forgot to call 811 Miss Dig, and the result was the unwanted large hole in this Paper Mill's one of two main water pipes carrying the needed water into the mill to be able to operate properly. Had this Paper Mill not called Unconventional Solutions, Inc., it would have cost them between \$300,000 - \$400,000 in lost production, and downtime to replace the pipe using conventional methods, they needed another solution. USI had been on the site the week before, refurbishing a utility pipe that had been in a corrosive environment. They contacted the USI Team once again, and the USI Technical Consultants had a great, cost effective, in place solution to fix the problem.

The area was prepped for safety as well as prepped the pipe area to be fixed according to the Technical Data Sheets of the products to be used for this in place solution. First **Resichem 574 Fastfill Plug** was applied. Fastfill Plug is a fast curing, water activated, reactive cementitious putty that works on concrete pipes and walls to stop any liquid seepage. Second, **Resichem 505 Damp Seal Primer** for wet concrete surfaces was applied to wet out fiberglass that was wrapped 6 ply's around the pipe. Third, **Resichem 501 CRSG**, a high build epoxy coating that protects both steel and concrete against corrosion and chemical attack was applied. Lastly, 6 ply's of **Resimetal 108 Pipe Repair Tape**, a high performance, rapid curing, moisture activated pipe wrap, was applied to provide the needed PSI strength for a long term solution. The client was pleased with the results.

USI is an Authorized Stocking Distributor for Resimac Ltd.

Check out our NEW Video!

Then Contact a USI Technical Consultant and ask about what might be the Long Term Unconventional Solution for you.

## FORWARD >>> THINKING

### DON'T FORGET SEPTEMBER & OCTOBER IS OUTAGE SEASON AND A CHANCE TO CHECK YOUR HVAC SYSTEMS!

Heat Exchangers, Chillers, and Water Boxes often suffer from Galvanic (Dissimilar Metal) Corrosion.

Call the USI Team for a Field Assessment of your Heat Exchanger or Chiller today at 248.735.7000.

A Field Assessment is a great way to get the Technical Support you need from Start to Completion.

#### CHILLER PHOTOS:

USI had a Big Ten University reach out to us for a 3rd time for a rebuild/refurbish of one of their Chillers after 2 previous successful rebuild/refurbishment of their Chillers in the past. This was successfully completed in April 2020.

#### The USI Team offers:

Technical Support • Training • Troubleshooting

HOTSHOT Same Day Local Deliveries for Emergencies for orders placed by 2:00PM EASTERN TIME
