# Leading Edge

**Did You Know That 560,000 Workers are Injured EVERY Year Due to Hot Work?**

**According to The National Fire Protection Association, \$484 Million in Direct Property Damage Results From Hot Work Fires Each Year.**

**What are you doing to improve safety in your facility?**

With these realities, something different must be implemented to keep your operations safer and more efficient. As a result, the most innovative companies are contributing to the strong and wise decision to turn to the application of Resimac coatings for:

**Metal Repair / Cold Weld Alternatives**  
**Repair of Leaking Pipes and Worn Equipment**  
**Chemical Tank Linings / Tank Patching**  
**Chillers and Heat Exchanger Refurbishment**  
**Corrosion protection**

**Resimac Resimetal 106 XF Metal Repair Paste** differs from **Resimetal 101** due to its fast cure times and ability to be applied underwater. RESIMETAL 106 is suitable for quick fixes on smaller areas considering the paste is fully machinable after 4 hours.

**Resimac Resimetal 108 Pipe Repair Tape** uses water activated urethane technology specifically developed for the repair of leaking pipes.

**Resimetal 108** is rapid curing, being fully machinable in 30 minutes, and is ideal for systems operating up to 400psi with maximum heat resistance against temperatures up to 518°F.

Eliminate the need for welding and brazing with **Resimac Resimetal 101 Metal Repair Paste** designed to fill surface erosion and corrosion on a wide range of surfaces. This two component solvent free epoxy technology has excellent mechanical adhesion to metallic substrates, a high build capacity, and has a compressive strength of 15,300psi.
