Leading Edge

Did You Know That Corrosion Costs U.S. Oil and Gas Companies Nearly \$1.4 Billion Annually?

According to a NACE study performed by the Association for Materials Protection and Performance (AMPP)

The study breaks down the extreme corrosion costs, with \$589 million going towards surface pipeline and facility costs, \$463 million towards down hole tubing expenses, and an additional \$320 million in capital expenditures caused by corrosion. These numbers help explain why anti-corrosion methods are necessary.

Approximately 60% of all coating failures are due to insufficient surface preparation. Luckily, Viscotaq™ coating system offers exceptional corrosion prevention and waterproofing for a variety of underground and aboveground

substrates with minimal surface preparation requirements. What makes the **Denso Viscotaq™ coating system** unique is its ability to adhere to virtually any surface including steel, polyethylene, polypropylene, and concrete while being malleable enough to mold to unsymmetrical areas and around cables.

Denso Viscotaq coating is regarded as a long term corrosion prevention material because of its permanent adhesion ability that lasts decades with no delamination. The patented Visco-Elastic systems are selfhealing, non-toxic, and 100% impermeable to water and oxygen.

AUCSC ON-SITE TRAINING - May 9-11

Doug Klingensmith
presenting at the May 9-11
AUCSC Training
(Appalachian Underground
Corrosion Short Course)
Morgantown, WV

Keeping You in the Know Since 2002

USI Dates to Remember

June 9 - USI Dayton-Cincinnati Golf Outing
(Miamisburg, OH)

June 16 - USI Wixom, MI Golf Outing (Milford, MI)

July 27 - OGO Golf Outing (Columbus, OH)

August 15-18 - MEA (Cincinnati Ohio)

When you partner with USI, you get:

- Denso, SPC, 3M and MBX certified product trainers
- AMPP / NACE Certified coating inspectors
- Product support specialists
- Same-day shipping on most products
- 24/7 Customer support for your project or repair

PRODUCT HIGHLIGHT

Denso MB-50 Tape

Denso MB-50 Tape is a tough, dimensionally stable, woven polyolefin fabric backing, laminated to a thick layer of polymer modified bitumen pressure sensitive adhesive. For the anti-corrosion protection of buried or immersed pipes and fittings. The tapes can be applied by hand or machine to weld joints, bends, bare pipe lengths and pipe fittings.

Product Features

- Applied to marginally prepared surfaces (SSPC SP 2-3)
- Meets AWWA C209 Standard
- Cold applied
- Good conformability
- Good impact resistance
- Excellent adhesion to pipe and self
- Excellent resistance to cathodic disbonding
- Compatible with common pipe coatings
