Partnering with Your Industry to Repair - Protect - Upgrade

December 2023

Leading Edge

Happy Holidays ~ Unconventional Solutions, Inc.

During this season of gratitude, we'd like to say "thank you" to our customers. We are truly grateful for your business and for customers like you that make us better at what we do. We are fortunate to have a long term customer base that supports our organization, that values what we do, and appreciates the effort that our team puts in everyday to make your organization better.

We would like to express our sincerest appreciation for the trust you have placed in us and best wishes for the holidays.

For over 20 years Unconventional Solutions has been partnering with industry to repair, protect and upgrade critical infrastructure. In the process we help avoid downtime and costly replacements. We pride ourselves on helping glue the world together one job at a time.

This December we want to reflect on what we have done this year, and more importantly the things we have not done. We are looking for how we can best serve you going into 2024.

First we want to thank you for your business this last year and we look forward to doing more with you in 2024. **Your feedback is very important to us and we value your input.**

Keeping You in the Know Since 2002

February 15

SEMPPEs Meeting at Whiskey's on the Water
(Wyandotte, MI)

PRODUCT HIGHLIGHT

LifeLast DuraShield 310

NSF-600 approved

Notes: Clear coat, but pigment packs are available

DuraShield 310-61 (DS310-61)

is a 100% solids, two-component polyurethane coating that contains no volatile organic compounds (VOC), solvents or hydrocarbon extending fillers. The DS310-61 Joint & Repair System (JARS) is a user-friendly polyurethane formulation that can be hand applied to field joints and used for repairs. The long pot life of DS310-61 allows for hand application on larger surfaces, and the short cure time decreases the waiting time between coats. The hydrophobic nature of DS310-61 makes it suitable for hand application without foam formation, even in humid environments. DS310-61 provides the low permeability and chemical resistance of an epoxy, with the durability, flexibility and fast cure times of polyurethanes.
