Industrial Roof Renovation *Restoration vs. Replacement*

It's commonly assumed that complete replacement is the best option for fixing and aging or leaking roof. In some cases, it is, but restoration is often a more desirable alternative. If a roof has failed it may be structurally unsound or if there is widespread damage replacement would be necessary. However, if the roof is only suffering from some damage, wear or other issues of exposure, restoration can be an alternative that would better work for you.

Roof replacement projects on industrial building are labor and resource-intensive and you can potentially run into the tens to hundreds of thousands of dollars on even moderate size buildings. Roof restoration generally comes in at a third of the cost or less of total replacement. Restoration requires fewer materials, man hours and involves maintenance rather than replacement, and is far less disruptive to regular business operations.

Your roof might need to be restored even if it isn't leaking in order to prevent more damage expenditures. **Find out more from Unconventional Solutions about your greatest options for fixing rather than replacing your problematic roof locations.**

**Chlor*Rid
SP8 Gel + Rinse:**
Revolutionary
Surface Decon-
tamination and
Coating Adhesion
Enhancer

**Innovative Two-
Step Process:** Utilizes
Chlor*Rid SP8 Gel
alongside ChlorRid

SP8 Rinse for a comprehensive surface cleaning that reaches the microscopic level. stands as a cornerstone in metal surface preparation and protection.

****Chlor*Rid SP8 Gel and Rinse are used in a system.
Make sure you have the both products on hand.**

**E/Fusing Self-Fusing
Silicone Rubber
Insulating Tape
ResiSelf-fusing
Silicone Sealing Tapes**

are designed for leak
sealing to mitigate
leak damage during
emergencies in harsh

environments. Use on punctured gas, steam or liquid pipelines.

- Meets UL 510 requirements
- UL 94 V-0 Class Flame Retardant
- Exceeds Military Specifications MIL A-A-59163 / Class H Insulation

Duomar SAR:
Advanced High-
Performance Rebuilding
Ceramic Putty

Duomar SAR putty is a
versatile easy-to-use
rebuilding putty with

excellent abrasion and chemical resistance. This product is heavily filled with aluminum oxide and can be built up to an inch in thickness or more. Typical applications are for rebuilding of pump casings, slurry tanks, weld seams or anywhere requiring the restoration of metal components.

Key Features:

- Superior Abrasion Resistance
- Chemical Resistance
- Temperature & Thermal Shock Resistance
- Extended Pot Life
