Revolutionize Your Corrosion and Erosion Protection

with Our Expert Specification Services

In the high-stakes world of the oil and gas industry, where the integrity of infrastructure is paramount, effective corrosion and erosion protection can mean the difference between operational excellence and costly failures. At Unconventional Solutions, we understand the critical role that precise and robust specifications play in safeguarding your assets. Our team of AMPP (Association for Materials Protection and Performance) certified coating inspectors is here to offer unparalleled expertise in writing and revising specifications for corrosion and erosion protection that meet the unique challenges of your projects.

Why Choose Unconventional Solutions?

- Expertise You Can Trust
- Tailored Solutions for the Oil and Gas Industry
- A Comprehensive Approach
- Specification Writing and Revision
- Consultation and Strategy Development
- Inspection and Quality Assurance
- Training and Support

Don't rely solely on chance to protect against corrosion and erosion. **Get in touch with us right now** to find out how our licensed inspectors can assist you in creating requirements that will endure. Together, let's use cutting-edge protection solutions to guarantee the durability and effectiveness of your operations.

DATES TO REMEMBER

April 10
Ohio Corrosion Committee Annual Spring Vendor Show (Bellville, OH)

May 7-9
Appalachian Underground Corrosion 3-Day Training Course (Morgantown, WV)

May 16
Indiana Corrosion Society - Quarterly Meeting - Golf Outing (Indianapolis, IN)

May 20-22
Southeastern Corrosion Short Course (Kennesaw, GA)

Denso Protal 7200 Brush Grade

is a VOC free, 100% solids, 2 part epoxy coating specially formulated to compliment FBE coated pipe. It is a high build liquid coating that is brush or spray applied (referred to

as Denso Protal 7250 in Canada) in one coat in the field or shop. It cures very fast to allow quick handling and backfill times.

Chlor*Rid – Chlor*Test Chloride Test Kit

the accurate way to perform chloride field testing – revolutionizing the industry.

CHLOR*TEST is so complete and easy to use that even the least experienced inspector can get accurate results. Imagine, a field test that is easy to use, yet more reliable than any other method of testing.

Chlor*Test by Chlor*Rid CSN SALTS

offers the specifier the availability of trouble-free performance testings, in the field, for chlorides, sulfates, and nitrates

with one extraction. Uses a unique patented extract solution, CHLOR*EXTRACT®, to retrieve surface salt contamination. This special extract enhances retrieval rates, thereby increasing accuracy. The greater the retrieval rate, the more accurate the test results.

Denso Bore-Wrap®

is an Abrasion Resistant Outerwrap (ARO) that has excellent performance against impact, gouge, abrasion, and fracture

to protect anti-corrosion coatings during pipeline installations in difficult terrain or by means of trenchless installation methods such as directional drilling, HDD or boring. Bore-Wrap creates an abrasion resistant, sacrificial outer laminate which protects pre-approved field joint coatings and main-line coatings such as epoxies, shrink sleeves,
