Providing innovative solutions to even the most challenging corrosion and coating issues.

Staying ahead in the rapidly changing field of coating and corrosion protection technologies requires not just utilizing the best materials but also comprehending their complete range of uses, advantages, and potential. **At Unconventional Solutions,** we think it's important to **give our customers the information and abilities they need to make the most of our cutting-edge solutions.**

Our staff offers a multitude of expertise and experience to any project, regardless of its size or type. Our expertise lies in offering inventive resolutions for the most complex corrosion and coating problems. Our strategy goes beyond simply providing items; it also involves providing specialized assistance based on your particular requirements and project objectives.

How We Can Assist With Troubleshooting: Our professionals can assist in swiftly and effectively diagnosing problems and providing workable solutions to restart your project.

Product Selection: Selecting the best corrosion protection and coating product might be difficult due to the large variety available. We'll help you navigate our product lineup to identify the ideal fit for your needs.

Long-Term Protection Strategies:

Are you considering long-term durability instead of just quick repairs? Together, we'll create plans that safeguard and prolong the life of your assets.

We inviting you and your team to schedule a product training session today!

US Coatings VSC1200: Advanced High Solids Polyester

Polyurethane Topcoat This top-tier product is designed to deliver long-term protection and durability, making it ideal for a wide range of industrial applications. The **US Coatings VSC1200** stands out with its unique formulation that incorporates Eastman TETRASHIELD™ resin technology, ensuring not only superior protection but also an aesthetically pleasing high-gloss finish.

Highland International 325R Zinc – Advanced 2-Component Zinc- Rich Epoxy Primer

Boasting an impressive 84% zinc dust content in its dry film, this primer sets a new standard in metal protection. The innovative formulation of **Highland International 325R Zinc** is tailored to ensure its overspray dries to a powder within 10-20 feet from the point of application.

Highland International 325R Zinc is not just a primer but a robust shield for metal surfaces. Its high zinc content is key to its effectiveness in preventing corrosion, making it an ideal solution for a variety of industrial applications.

US Coatings EpoxyGrip 2000: High-Performance

Epoxy Mastic Coating Designed to excel in highly corrosive environments, **EpoxyGrip 2000** offers a robust solution for a variety of industrial applications. This product is not just a coating; it's an armor for your structures, providing long-lasting defense against the elements. It serves as an exceptional intermediate or topcoat over zinc-rich primers and can be top-coated with polyurethane finishes for enhanced color fastness in exterior applications.
