Are you ready for 2025

Get or renew your certifications and learn more to improve your skills.

Ensure your readiness for 2025 by acquiring new or renewing expired certifications, or enhancing your qualifications through training.

CERTIFICATIONS:

No matter what part of the pipeline world you work in, keeping certifications up-to-date is important. We at Unconventional Solutions know how important it is to keep up with the latest trends. That's why we offer certifications that put your employees and your company at the top of your field. New technologies, guidelines, and best practices are always being added, so keeping all certifications up-to-date is important. Everyone has worked hard to get these credentials, so making sure they are up-to-date will help you keep your business and employees safe. We are here to help you through the renewal and certification process, no matter what level or certification that is needed.

OUR TRAINING:

We're here to safeguard your skills and your company's assets through education, credentialing, accreditation, innovation and standardization. Our corrosion courses are developed and taught by NACE certified Corrosion Specialist with over 30 years of practical experience in the field.

If you are concerned with corrosion in your company, in-house training or on-site training is a great solution to train a group of employees from design, production, operation, quality assurance, inspection and maintenance, and technical sales and support on corrosion control and corrosion prevention technology. The contents of all corrosion courses can be customized to fit your organization's needs. There is no minimum or maximum number of participants required for in-house training corrosion courses. We conduct the in-house training corrosion course at your company's premises worldwide, and at a time convenient to your company.

Unconventional Solutions has 3 certified Denso Trainers, also an SPC Certified Trainer, and two 3M Scotchkote Trainers along with 2-AMPP (formerly NACE) Senior Coating Inspectors (CIP-3) and our owner Tiffany is an AMPP Coating Inspector (formerly NACE CIP-2 Coating Inspector).

Denso Protal 7125

is specifically formulated to be applied to colder substrates at colder ambient temperatures. It is a high build liquid coating that is brush or spray applied in one coat to many

areas of in-service pipelines or during pipeline construction in the field. It cures fast to allow quick handling and backfilling, even down to -4°F (-20°C). Denso Protal 7125 is intended for use where a quick cure is required at lower substrate and/or ambient conditions such as during winter applications or on colder operating temperature pipelines.

3M™ 323+ Scotchkote – 450ML Cartridges

3M™ 323+ Scotchkote Liquid Epoxy Coating is the latest innovation in Liquid Epoxy Coatings from 3M. This two-part system features improved

adhesion, flexibility and impact resistance to help prevent corrosion on steel pipes and other metal surfaces.

100% solids. VOC Free. Excellent adhesion
High build, up to 45 mils, in one application
Can be applied to a substrate as cold as 41°F/5°C

Viscotag EZ Wrap: Premium Corrosion Prevention and Waterproofing Coatings

Viscotag EZ Wrap is a cutting-edge, amorphous, apolar, visco-elastic, semi-solid polyolefin coating designed

for superior corrosion prevention and waterproofing of both underground and aboveground substrates. As a key component of the Viscotag coating system, it involves a sealant or mastic with EZ Wrap coverage, supplemented by a mechanical protective layer if necessary. This system is engineered to deliver unparalleled corrosion resistance for a wide range of substrates.

DATES TO REMEMBER

December 4
Ohio Corrosion Committee Meeting
(Bellville, OH)

December 4 (PODCAST)
#TechTalk - Ask the Experts

December 18 (PODCAST)
#TechTalk - Rian Gaskins with STOPAQ

**December 24-25 and
December 31-January 1**
Closed. Happy Holidays

January 14
AMPP Chicagoland
(Joliet, IL)
