placed by 12 p.m. EASTERN TIME

DECEMBER 2024 | WWW.USIGROUPS.COM

## Choosing the right partner to help with corrosion control solutions

Unconventional Solutions is a trusted partner in corrosion control solutions for the water and wastewater treatment industry. We specialize in providing comprehensive services to prevent and repair corrosion-related issues, offering advanced coatings, linings, FRP work, and concrete services. Our mission is to safeguard the integrity and longevity of your infrastructure, reduce maintenance expenses, and ensure uninterrupted operation of your treatment facilities.

Products certified by Unconventional Solutions as meeting NSF/ANSI/CAN 61 and 372 standards are suitable for use with potable water, and the company's experts are familiar with all three standards. In addition, we offer creative solutions and round-the-clock support to ensure the seamless operation of your business.

We have simple to use metal repair composites to rebuild shaft journals, keyways and bearing housings in-place allowing you to avoid hazardous "hot work", fire watches and refurbish secondary containments and clarifiers. If you have leaking pipes, we have several product systems to make quick repairs without cutting out and replacing pipe.

We understand the importance to have ceramic repair polymers and protective coatings with NSF-600 approvals to protect pumps, valves and piping from erosion, corrosion or chemical attack.

Concerned about chemical protection? USI has several AMPP/NACE Certified Coating Inspectors, who can do coating audits to let you know what is working and not working when it comes to protecting your steel and concrete structures from aggressive chemicals or corrosion. We can even write tailored coating specifications to lower your overall cost and potential vulnerability.

Contact us for a site audit and let us optimize your infrastructure protection today!

### DATES TO REMEMBER

**December 4 (PODCAST)**  
#TechTalk - Ask the Experts

**December 18 (PODCAST)**  
#TechTalk - Rian Gaskins with STOPAQ

**December 24-25 and  
December 31-January 1**  
Closed. Happy Holidays

**January 16**  
SEMPPEs Meeting Bakers of Milford  
(Milford, MI)

**January 22**  
MWEA's Annual Wastewater Adminis-  
trators Conference (WWAdCon)  
(Frankenmuth, MI)

### Denso Archco 426 Epoxy: Ultra-High Solids Lining for Potable Water Systems

Denso Archco 426 Epoxy is a two-part, ultra-high solids, low-VOC, drinking water

safe epoxy lining for immersion service in potable water pipes and storage tanks. It does not require induction and may be applied in one or two coats.

Denso Archco 426 Epoxy is engineered to offer robust, long-lasting protection for critical water infrastructure components, simplifying maintenance and ensuring compliance with health safety standards.

### Resimac 203 Super Flow Ceramic Repair: Enhanced Flow Efficiency Epoxy Fluid with Ceramic Fillers

Resimac Resimetal 203 Superflow Ceramic Repair Fluid is an erosion-corrosion

resistant coating used principally in fluid flow situations for improving flow efficiency. The material can be applied directly to abrasive blasted steel or to surfaces previously rebuilt with Resimac 101 Metal Repair Paste or 201 Ceramic Repair Paste.

**BEST USED AS A TWO COLOR SYSTEM!  
APPLY RED FIRST, THEN GRAY.**

*During regular maintenance checks, if you start to see RED, you will know it is time to re-coat before extreme wear/damage takes place.*

### USI Ultimate Pipe Repair Kit: Essential Solution for Any Pipe Leak Scenario

The USI Ultimate Pipe Repair Kit is an indispensable tool for Facility

Maintenance Managers as a quick pipe leak repair product, akin to having a fire extinguisher ready for emergencies. Designed to efficiently handle metal and PVC pipe leak repairs of any size, this comprehensive kit is a must-have for rapid and effective pipe repair.
