Green Solutions for Hydrocarbon Spills: Peat Sorb in Action

When hydrocarbons spill, quick containment is critical—but the environmental impact of cleanup methods can't be ignored.

That's where **Peat Sorb** comes in. Made from 100% organic peat moss, Peat Sorb naturally absorbs hydrocarbons while repelling water, making it ideal for land or water-based cleanups.

Lightweight, non-toxic, and biodegradable, Peat Sorb is **easy to use** and even easier to dispose of—absorbed hydrocarbons are locked in, preventing leaching back into the environment. Whether you're dealing with oil, fuel, or industrial hydrocarbons, Peat Sorb offers a safe, effective, and **eco-friendly** cleanup solution. Peat Sorb can break down long chains in **PFAS** reducing movement in soil effectively capturing and stabilizing contamination.

In Port Huron, Michigan a 500 gallon diesel spill shut down a major road. The local fire department used **Peat Sorb** to clean up the spill, and the road was back open to traffic in just about **2.5 hours!**

Stop the Leaks: Restoring Roofs with **Resimac**
Leaking roofs don't just cause damage—they disrupt operations, increase safety risks, and drive up repair costs. **Resimac waterproof coatings** provide a proven, long-term repair system designed to restore and protect aging or damaged roofs.

Resimac 551 ER is made for quick **emergency** repairs and can be applied while it is raining. Acting fast to be shower proof in just **15 minutes**.

Resimac 550 WR is a single component waterproof coating that can repair whole roofs **without adding another layer**.

NEW!

Resimetal 101 XHT

is a two component, solvent free epoxy novolac repair compound formulated for high temperature metal restoration. It resists extreme operating conditions, retaining its strength at temperatures up to 464°F dry heat and 356°F in immersion, ensuring long lasting performance.

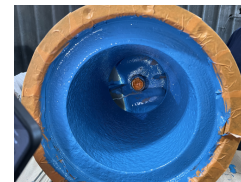

Resichem 551ER

High-performance, water-based acrylic roof coating designed for emergency waterproofing applications

Resichem 501 CRSG

High build solvent-free epoxy coating designed for the long term protection of steel and concrete structures against corrosion and chemical attack.

Resichem 511 UCEN

High build solvent-free epoxy novolac coating designed to provide outstanding chemical and corrosion protection of steel and concrete structures
