Grid-Guard HD Plus+ Lightweight, Durable Rock Shield

Rock Shield Protection That Outperforms the Rest

During backfill and geological movement, coatings can be damaged by rock impact and stress. Grid-Guard HD Plus+ Rock Shield provides superior protection - offering the strength of polyethylene with the softness of geotextile to safeguard coatings without bunching or tearing.

Why Choose Grid-Guard HD Plus+?

Proven Cold-Weather Flexibility: Tested to -50 °F – remains pliable even after exposure to extreme cold and moisture.

Superior Impact Resistance: >141 in/lb impact resistance.

No Bunching in Cradles: Lightweight geotextile allows natural movement around the pipe, eliminating stress points.

CP-Safe and Non-Shielding: Verified by third-party testing – no cathodic protection interference.

Easy Installation: Lightweight rolls (50 ft) use half the tape and install faster.

Specifications at a Glance

- Extruded polyethylene (25% recycled) laminated to 6 oz geotextile
- 3/8" (11 mm) thickness | Compressive strength ≥ 90 psi @ 50% deformation
- "No Failures" in ASTM rock drop testing

Trusted by 30+ Major Gas Companies

APRIL 8
Ohio Corrosion
Committee Meeting

Viscotag Viscowrap

- High-performance coating
- Amorphous structure
- Apolar composition
- Visco-elastic
- Semi-solid polyolefin material
- Designed for effective corrosion prevention
- Suitable for both underground and aboveground substrates
- Performs under moderate temperature conditions

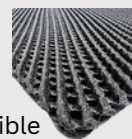

S2S 5-in-1 Anti-Corrosion Wipes

Non-woven wipes infused with a **rust** and **corrosion-inhibiting** formula that adheres to **all types of metal**. The wipes can **clean**, **lubricate**, and **protect** your tools and metal surfaces.

Grid-Guard HD Plus+

- Lightweight and flexible
- Cathodic Protection Compatible
- Enhanced Impact Protection during backfill
- Geotextile backing acts as a slip sheet, helping to reduce soil stress on coatings and adding extra protection after burial.

Resimac Chemical Resistant Coatings

We carry the complete range of coatings and linings to protect equipment and piping from chemical attack –if your assets are at risk, contact USI today.
